To Whom It May Concern:

Let this serve as a letter of recommendation for S.E. Cline Construction for their work during Phase 2 Redevelopment of the Marineland Marina.

The Town of Marineland has been undergoing redevelopment as it transforms from a wholly tourist-oriented town to one of more varied opportunities. It acquired the marina and began to rebuild it as a public facility after being closed for a decade due to lack of maintenance. Financing for phase 2 came from the Florida Inland Navigation District, the Flagler County Tourist Development Council, the Florida Fish and Wildlife Conservation Commission, the Florida Dept. of Environmental Protection, and the Town of Marineland. This allowed Marineland to expand on the improvements made during Phase 1 Redevelopment of the Marineland Marina, which S.E. Cline also worked on.

Under the direction of Hap Cameron, Cline Construction was able to work closely with the Town of Marineland and marina management to build a facility within its very tight budget, even to the extent of allowing the town to buy the construction materials and save on sales tax. Once construction started it progressed expeditiously, resulting in a solid and well build facility. As problems arose during construction, Mr. Cameron quickly moved to resolve them and keep the project on schedule. His solutions were sound and added to the value of the project.

Cline Construction was able to work closely with marina personnel and kept them aware of progress at all times. This added greatly to our comfort level and satisfaction with the way the project was progressing. We are delighted with the result and have had nothing but compliments from boaters as they begin to use the marina. We would have no hesitation in working with Cline Construction in the future, or in recommending their services to anyone else who is considering their firm.

Sincerely,

Leslie S. Babonis, PhD
Mayor, Town of Marineland
