Re: St. Augustine Waste Water Treatment Plant #1 Design and
Construction of 30" Outfall Pipe

To Whom It May Concern:

S.E. Cline Construction, Inc., did work with the City of St. Augustine in value engineering and construction of the 30" Outfall pipeline in late spring of 2009. I appreciate their providing an innovative solution to the replacement of the pipe; the design and permitting successes with FDEP, the US Army Corps of Engineers, and the US Fish and Wildlife Commission; the cost-savings provided to the City by allowing our purchasing department to procure most of the materials for the project without sales tax; and the responsiveness and availability that your staff provided throughout the project.

Please feel free to me as a reference for the project.

Sincerely,

John P. Regan, P.E.
City Manager
